Washington, D.C.

Re: Small Businesses Calling for Recurring Direct Cash Payments

Dear Members of Congress:

The COVID-19 crisis has devastated small businesses. A recent survey of small businesses revealed that one in four of the nation's 30 million small businesses risk permanent closure in the next five months. While efforts to support small businesses through loans and grants have provided some relief to some business owners, many of us are unable to get the help we need. We as business owners need flexibility. Our employees need support. And that's why we're calling for direct cash payments of \$2,000 per month until the economy recovers.

Cash is the most practical support for small business owners facing unforeseen challenges and an unknown future. It's no wonder that 80% of small business owners approve of cash. Cash can help:

- Keep business owners and our families afloat when we're not earning income. Many small business owners don't have a cushion, and we may not be eligible for unemployment benefits. Direct cash payments enables us to pay our bills and take care of our families while our businesses are shut down.
- Maintain our business during shutdown/partial re-opening. If our PPP loan is insufficient or nonexistent — cash provides funds to do what we need to adjust to a changing landscape.
- Boost the local economy and speed recovery. Small business spending — whether paying employees or rent — goes right into the local economy, strengthening the local community and helping everyone recover faster.

Please support recurring cash payments of \$2000 a month for ALL Americans until the economy recovers.

Sincerely,

Concerned Small Business Owners of America
